DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 6,026,160 (Staber et al.).

With respect to claims 1 – 15, Staber et al. teach the claimed limitations as can be seen in the Figs. In addition, see the Abstract, Background of the Invention and the Summary of the Invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is further rejected under 35 U.S.C. 103(a) as being unpatentable over Fig.1 of the instant application.

Claim 15 is so broad as to be obvious in view of Fig. 1 of the instant application. To take a device and separate it in to parts or to take part of a device and make it into a single device carries no patentable weight. It would have been obvious to one of

ordinary skill in the art to take an integral device and make it separable or vice-a-versa. In addition, claim 15 reads on Fig. 1 of the instant application or is obvious in view of Fig. 1, at for the first time the device is made.

Response to Arguments

Applicants' arguments filed 09/17/2004 have been fully considered but are not deemed persuasive to any error in the rejections above.

Applicants argue limitations that are not found in the claims. For example, applicants argue that the instant application terminates DSL services however, no such limitation is found in the independent claims. Applicant further argues with respect to claim 15, about high speed telecommunications services, however ADSL is a speed service.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
